The **ASOMP-CPC (Asian Society of Oral & Maxillofacial Pathology Clinicopathological Correlation)** series is an online educational series of case-based activities focusing on *interesting and instructive cases* related to the field of Oral & Maxillofacial Pathology to promote continuous professional development. .

Submissions should highlight cases that are of clinical interest, have unusual symptoms and/or diagnostic findings, or involve rare diseases or conditions aiming to provide:

1. New information that sheds light on pathogenesis or related aspects of disease.
2. New information that enhances knowledge on the disease process, including the discovery of new ancillary techniques for diagnosis.
3. Unusual, clinicopathological features that need further study.

ASOMP-CPC Case Submission Requirements:

1. General Requirements. All cases should be submitted via email to secretary@asomp.com
2. Author Information. Name & title, institutional affiliation, email address, phone number & HOD consent if the case is submitted by a student.
3. Social handles for authors and their institutions, if available.
4. Author Photo. Please submit a "head shot" to be posted with your case.
5. Clinical history. Brief introductory paragraph about the patient or biopsy. Include essential clinical information (HPI, relevant medical history, physical exam findings, lab tests & prior treatments)

6. Images: high resolution images of clinical radiographic, pathologic & special techniques findings whenever indicated. In general, multiple radiographic views/MRI/CT images. All images should be submitted at 300dpi
7. Video: Videos should be high resolution, narrated, and 30-90 seconds in length
8. Format. Files may be no larger than 50 MB
9. If the case is posted the author will be required to respond to readers' comments online for the first month that the case is online.

Sample ASOMP-CPC Case Outline

1. Brief synopsis about the patient or biopsy (essential clinical information - HPI, relevant medical history, physical exam findings, lab tests & prior treatments)
2. Imaging Provide high resolution images with descriptions of the relevant radiographic findings
3. What's your differential diagnosis?:
4. What's your next step?: Which of the following is most likely to confirm the diagnosis? (could include immunohistochemical or special stains, genetic testing, in situ hybridization or other ancillary techniques)
5. Synopsis of Results: Provide a synopsis of the results and diagnosis based on the testing discussed.
